

Pure Shea Butter... Out Of Africa

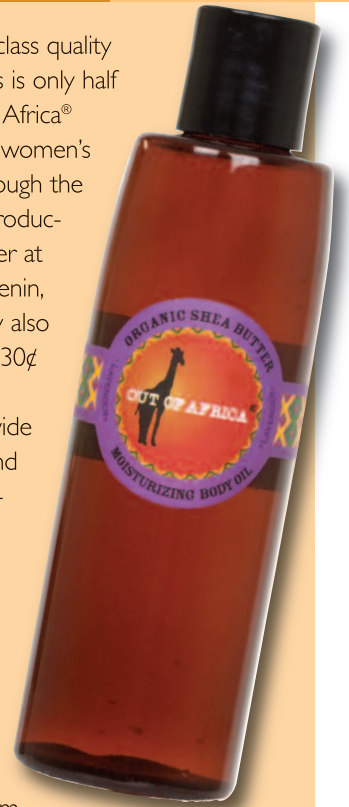

Producing first-class quality skincare products is only half the story. Out of Africa® supports several women's cooperatives through the harvesting and production of shea butter at their factory in Benin, West Africa. They also contribute 5¢ to 30¢ for each product sold to help provide health benefits and education to children in West Africa through their School Children Unite program and are a proud supporter of the PBS educational program "Time for School".

The Out of Africa® line includes organic shea butter bar soaps, hand and body washes, hand and body lotions and creams, moisturizing body oils, lip balms and organic unrefined shea butter in tins.

To learn more, visit the website and watch the 5-minute video at

Out of Africa's shea butter products keep your skin healthy with 100% unrefined organic shea butter that is hand made in Benin, West Africa. A natural moisturizer and emollient, shea butter contains antioxidant vitamins A, E & F and beneficial fatty acids that leave your skin feeling nourished, revitalized and refreshed.

Unlike other companies that only use 1-2% refined (processed) shea butter, Out of Africa® products contain a substantial amount of unrefined (pure) shea butter – such as 10% in the hand and body lotions, 20% in the bar soaps and 30% in the lip balms! They are also fragranced with wonderful, fresh scents at indulgent levels.
